

PERNUMA OFFICE C Electric Corner Cutter

With the model OFFICE C the corner of documents, booklets, entrance tickets etc. can be cut off diagonally. But the machine can also be used for cutting cardboard or synthetic material like plastic cards.

It is equipped with corresponding gauges which make an easy positioning of the documents possible.

In its standard version a knife with a length of ca. 70 mm is installed. The cutting line can be shortened by adjusting the right-hand gauge. The left-hand gauge is fixed.

The cutting process is released by pressing the lateral push-button.

Up to 100 sheets of 70 g/m² paper can be cut in one operation. The insertion height is ca. 10 mm.

As an option a foot-pedal switch is available.
