

**PERNUMA PERFOSET II/CP**  
Hand-operated Corner Perforating Machine

**As a manual machine in order to make tear-off perforations in the shape of a quadrant or a diagonal into the corner of documents we have the model PERFOSET II/CP in our product range.**

It is equipped with fixed gauges in its standard version which allows an easy positioning of the documents.

In case of order please let us know what radius or what length regarding the perforation line is required. The machine is produced according to your requirements.

You can also choose the pin diameter which can be 0.8, 0.9, 1.1 or 1.25 mm.

The capacity of the machine is ca. 25 sheets of 70 g/m<sup>2</sup> paper. The insertion height is ca. 2.5 mm.

If required it can be equipped with a security lock.

**In a special version available with**

- a perforation line adjustable in its length or with interchangeable line lengths
- adjustable or interchangeable radii
- several pin diameter in one machine

**Technical Data**
